

Times Tables

Name _____

The 1 times table

One times zero is

$$1 \times 0 = \square$$

One times one is

$$1 \times 1 = \square$$

One times two is

$$1 \times 2 = \square$$

One times three is

$$1 \times 3 = \square$$

One times four is

$$1 \times 4 = \square$$

One times five is

$$1 \times 5 = \square$$

One times six is

$$1 \times 6 = \square$$

One times seven is

$$1 \times 7 = \square$$

One times eight is

$$1 \times 8 = \square$$

One times nine is

$$1 \times 9 = \square$$

The 2 times table

Two times zero is

$$2 \times 0 = \square$$

Two times one is

$$2 \times 1 = \square$$

Two times two is

$$2 \times 2 = \square$$

Two times three is

$$2 \times 3 = \square$$

Two times four is

$$2 \times 4 = \square$$

Two times five is

$$2 \times 5 = \square$$

Two times six is

$$2 \times 6 = \square$$

Two times seven is

$$2 \times 7 = \square$$

Two times eight is

$$2 \times 8 = \square$$

Two times nine is

$$2 \times 9 = \square$$

The 3 times table

Three times zero is

$$3 \times 0 = \square$$

Three times one is

$$3 \times 1 = \square$$

Three times two is

$$3 \times 2 = \square$$

Three times three is

$$3 \times 3 = \square$$

Three times four is

$$3 \times 4 = \square$$

Three times five is

$$3 \times 5 = \square$$

Three times six is

$$3 \times 6 = \square$$

Three times seven is

$$3 \times 7 = \square$$

Three times eight is

$$3 \times 8 = \square$$

Three times nine is

$$3 \times 9 = \square$$

The 4 times table

Four times zero is

$$4 \times 0 = \square$$

Four times one is

$$4 \times 1 = \square$$

Four times two is

$$4 \times 2 = \square$$

Four times three is

$$4 \times 3 = \square$$

Four times four is

$$4 \times 4 = \square$$

Four times five is

$$4 \times 5 = \square$$

Four times six is

$$4 \times 6 = \square$$

Four times seven is

$$4 \times 7 = \square$$

Four times eight is

$$4 \times 8 = \square$$

Four times nine is

$$4 \times 9 = \square$$

The 5 times table

Five times zero is

$$5 \times 0 = \square$$

Five times one is

$$5 \times 1 = \square$$

Five times two is

$$5 \times 2 = \square$$

Five times three is

$$5 \times 3 = \square$$

Five times four is

$$5 \times 4 = \square$$

Five times five is

$$5 \times 5 = \square$$

Five times six is

$$5 \times 6 = \square$$

Five times seven is

$$5 \times 7 = \square$$

Five times eight is

$$5 \times 8 = \square$$

Five times nine is

$$5 \times 9 = \square$$

The 6 times table

Six times zero is

$$6 \times 0 = \square$$

Six times one is

$$6 \times 1 = \square$$

Six times two is

$$6 \times 2 = \square$$

Six times three is

$$6 \times 3 = \square$$

Six times four is

$$6 \times 4 = \square$$

Six times five is

$$6 \times 5 = \square$$

Six times six is

$$6 \times 6 = \square$$

Six times seven is

$$6 \times 7 = \square$$

Six times eight is

$$6 \times 8 = \square$$

Six times nine is

$$6 \times 9 = \square$$

The 7 times table

Seven times zero is

$$7 \times 0 = \square$$

Seven times one is

$$7 \times 1 = \square$$

Seven times two is

$$7 \times 2 = \square$$

Seven times three is

$$7 \times 3 = \square$$

Seven times four is

$$7 \times 4 = \square$$

Seven times five is

$$7 \times 5 = \square$$

Seven times six is

$$7 \times 6 = \square$$

Seven times seven is

$$7 \times 7 = \square$$

Seven times eight is

$$7 \times 8 = \square$$

Seven times nine is

$$7 \times 9 = \square$$

The 8 times table

Eight times zero is

$$8 \times 0 = \square$$

Eight times one is

$$8 \times 1 = \square$$

Eight times two is

$$8 \times 2 = \square$$

Eight times three is

$$8 \times 3 = \square$$

Eight times four is

$$8 \times 4 = \square$$

Eight times five is

$$8 \times 5 = \square$$

Eight times six is

$$8 \times 6 = \square$$

Eight times seven is

$$8 \times 7 = \square$$

Eight times eight is

$$8 \times 8 = \square$$

Eight times nine is

$$8 \times 9 = \square$$

The 9 times table

Nine times zero is

$$9 \times 0 = \square$$

Nine times one is

$$9 \times 1 = \square$$

Nine times two is

$$9 \times 2 = \square$$

Nine times three is

$$9 \times 3 = \square$$

Nine times four is

$$9 \times 4 = \square$$

Nine times five is

$$9 \times 5 = \square$$

Nine times six is

$$9 \times 6 = \square$$

Nine times seven is

$$9 \times 7 = \square$$

Nine times eight is

$$9 \times 8 = \square$$

Nine times nine is

$$9 \times 9 = \square$$
